

WHAT IS CLAIMED IS:

1. A fastening belt for wrapping electric cables, comprising:

an elongate belt having a plurality of protrusions extending from each of two sides of the belt, a plurality of slots defined through the belt and each including
5 an operation section which is offset from the slot, a bending portion defined by the operation section and being bent outward from the belt.

2. The belt as claimed in claim 1, wherein the slots are transversely located between the two sides of the belt.

3. The belt as claimed in claim 1, wherein the bending portions each are in
10 a form of a rectangular plate.

4. The belt as claimed in claim 1, wherein the bending portions each are in a form of a trapezoid plate.
